MD Publications Pvt Ltd, New Delhi, 2008. Hardcover. Condition: New. 413pp., The field of biotechnology has revolutionized the concepts in agriculture, food, industrial feed stocks and health care in the past three decades. It has furnished new tools and techniques to enhance the agricultural productivity, raise value-added products and health care systems and has ensured better environments. Over the years it has exploited biological systems at all levels of complexity or organisations for improving the life of common man. Scientific breakthroughs in gene expression, protein engineering, and drug designing, animal health care, industrial chemistry, preservation of biodiversity and cell fusion are being increasingly translated into new products and services. Rapid advances in different areas of biotechnology have ushered tremendous changes in agriculture, medicine and cell biology. The present book Current Topics in Biotechnology incorporates review articles on varied aspects of biotechnology. The volume contains 10 chapters written by experts in the disciplines, Dr Edison T Liu, Executive Director of the Genome Institute of Singapore has briefly discussed What is next in biotechnology Dr Weichang Yu and Dr James A.Birchler have reviewed Minichromosomes: The next generation technology for plant genetic engineering.
